Career Summary

Detail-oriented and versatile software developer with a strong foundation in software engineering and practical experience in data analytics.

Proven ability to build scalable and responsive web applications using modern front-end technologies such as React and Vue.

Skilled in database design and management, automation scripting, and leveraging data insights to inform technical decisions.

Adept at collaborating in agile teams and delivering high-quality, maintainable code.

Passionate about continuous learning and applying innovative solutions to solve real-world challenges in dynamic environments.

Education**Bachelor of Science in Software Engineering**

Adventist University of Central Africa (AUCA)

Gishushu, Gasabo, Kigali, Rwanda

Expected Graduation: 2025

- Currently in the final year of studies with a focus on software design, development methodologies, database management, and system security
 - Completed coursework includes advanced programming, web development, software project management, and data analytics
-

Work Experience**Front-End Developer**

Sinc Co — Remote

January 2024 – Present

- Collaborate with cross-functional teams to develop a responsive, user-friendly event ticket booking platform
- Utilize JavaScript frameworks React and Vue to build dynamic, interactive UIs with reusable components

- Implement best coding practices using ESLint and Prettier to ensure code quality
- Contribute to UI/UX design discussions to optimize performance and accessibility

Data Analytics & Solution Consultancy Development Program (Intern)

Keyrus — Kigali, Rwanda

August 2024 – October 2024

- Participated in a hands-on development program focused on business intelligence and data visualization
- Collected, cleaned, and analyzed large datasets to generate actionable insights
- Supported the design and deployment of data-driven solutions to enhance efficiency
- Developed communication and consultancy skills through collaboration with senior analysts

Freelance Web Developer

Self-Employed

January 2023 – December 2023

- Developed a responsive website for Peace Spa using HTML, CSS, Bootstrap, and JavaScript
- Built a research center site with HTML, CSS, and PHP, focusing on data correction and integration
- Managed the entire project lifecycle from gathering requirements to deployment
- Maintained communication with clients to ensure satisfaction and implemented feedback
